Summary

- Bay Area born-and-raised software engineer with a background in education and classroom teaching
- Experience with voice user interface and web application development using JavaScript, Ruby on Rails, React, MEN stack, AWS, RESTful APIs
- Skills are equal parts technical and creative, with an eye for both debugging and design
- Outlook geared toward modern, responsive, user-oriented client side implementing RESTful APIs and scalable, maintainable codebase

Projects

peached.ink — www.peachedink.com

Technologies: Ruby on Rails, PostgreSQL, Bootstrap 4, Heroku, BCrypt

Presented as capstone project for Web Development Immersive.

peached.ink is an online art portfolio for illustrator Kean Saetern. Visitors can view her illustration slideshows, read her profile, and connect with her. Behind the scenes, Kean can log in to the app through a hidden endpoint to access her custom CMS, update her profile, and CRUD her own illustrations.

Moviee — moviee-clone.herokuapp.com

Technologies: React, The Movie Database API, Heroku

Moviee is a React single-page application that displays recently released popular movie selections according to The Movie Database (TMDB) API. Users can also search the TMDB database for a particular movie. This app is a replication of Moviee (moviee.surge.sh), updated to resolve various issues in the original codebase.

Experience

General Assembly (San Francisco, CA)

Web Development Immersive Student

June - September 2017

Designed and developed full stack web applications from wireframes to deployment, while acquiring fundamentals in computer science and work-ready skills in writing code, project management, Git workflow, pair programming, and testing.
