Summary

- Bay Area-native web application developer with a background in education and creative writing, ready to contribute as a full-stack engineer.
- Experience with Ruby on Rails, Express JS, React, JavaScript, Heroku, Git collaboration.
- Skills are equal parts technical and creative, with an eye for both debugging and design.
- Outlook geared toward modern, responsive, user-oriented client side implementing RESTful APIs and scalable, maintainable codebase.

Projects

peached.ink — www.peachedink.com
Technologies: Ruby on Rails, PostgreSQL, Bootstrap 4, Heroku, BCrypt
Presented as capstone project for Web Development Immersive.
peached.ink is an online art portfolio for illustrator Kean Saetern. Visitors can view her illustration slideshows, read her profile, and connect with her. Behind the scenes, Kean can log in to the app through a hidden endpoint to access her custom CMS, update her profile, and CRUD her own illustrations.

Ponder — ponder-blog.herokuapp.com
Technologies: Ruby on Rails, PostgreSQL, Materialize, Digital Ocean, BCrypt
Served as creator of Ponder and project leader for a team of three developers.
Ponder is a distraction-free microblogging app for creative writers, prioritizing the distribution of original content in the form of philosophies, poems, prose, or movie/music/TV show reviews.
