DARYL JASON LAZARO

One of the few full stack web developers born, raised and residing in the Bay Area who can play eight different instruments, ranging from the guitar to the euphonium. Skill set is equal parts technical and creative, with an eye for both debugging and design. Let's get together and discuss web development projects, or start a jam session.

PROJECTS

peached.ink — www.peachedink.com

peached.ink is an online art portfolio for illustrator Kean Saetern. Visitors can view her illustration slideshows, read her profile, and connect with her. Behind the scenes, Kean can log in to the app through a hidden endpoint to access her custom CMS, update her profile, and CRUD her own illustrations.
Presented as capstone project for Web Development Immersive.
Technologies: Ruby on Rails, PostgreSQL, Bootstrap 4, Heroku, BCrypt

Ponder — www.ponder.ca

Ponder is a distraction–free microblogging app for creative writers, prioritizing the distribution of original content in the form of philosophies, poems, prose, or movie/music/TV show reviews.
Served as creator of Ponder and project leader for a team of three developers.
Technologies: Ruby on Rails, PostgreSQL, Materialize, Digital Ocean, BCrypt

EXPERIENCE

General Assembly (San Francisco, CA)
Web Development Immersive Student

JUNE - SEPTEMBER 2017

Designed and developed full stack web applications from wireframes to deployment, while acquiring familiarity in computer science and work–ready skills in writing code, project management, Git workflow, pair programming, and testing.
